

R070LD10

LINEAR INTEGRATED CIRCUIT

VOLTAGE REGULATOR

DESCRIPTION

As the UTC linear integrated LDO, the UTC **R070LD10** shows a high current, high accuracy, low-dropout voltage which built in on/off function. The features are: low dropout voltage, very low ground current. Cause the series have been designed for high current loads, so they are also used in lower current, extremely low dropout-critical systems (in which their tiny dropout voltage and ground current values are important attributes).

FEATURES

- * Built-in ON/OFF Function
- * Over Current Protection Function
- * Over Heat Protection Function
- * Adjustable DC Output Voltage
